## How to prevent pandemics?

# Invest in biodiversity

Save lives and money, and address climate change

by Julia Marton-Lefèvre

CHAIRPERSON, CEPF DONOR COUNCIL

Julia Marton-Lefèvre.  
© Julia Marton-Lefèvre

Governments and other entities around the globe have spent a lot of time, money and energy addressing the health and economic consequences of the COVID-19 pandemic and coming up with medical and economic solutions. These actions are necessary, as so many people's lives and livelihoods have been lost or are gravely threatened.

Applying a similar sense of urgency, the world's leaders would be wise to also direct more attention and resources to the root cause of the emergence of zoonotic pandemics: human disturbance of nature.

Unsustainable exploitation of the environment—through land-use change, agricultural expansion and intensification, wildlife trade and consumption, and other drivers—is the source of almost all pandemics, according to a 2020 report from a gathering of experts on biodiversity and pandemics convened by the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES).

The resulting costs are astounding. First, of course, is the human toll—1.9 million deaths from COVID-19 alone as of January 2021. Many more have suffered serious illness and lasting symptoms. The monetary cost of the current pandemic also grows daily. By July 2020, the costs were estimated at US\$8 trillion to US\$16 trillion globally, according to the IPBES report, costs that have surely climbed exponentially since then.

Unsustainable exploitation of the environment—through land-use change, agricultural expansion and intensification, wildlife trade and consumption, and other drivers—is the source of almost all pandemics.

The IPBES report estimates a markedly lower cost of US\$22 billion to US\$31.2 billion for the implementation of global strategies to prevent pandemics. These strategies include reducing wildlife trade and land-use change and increasing surveillance of human, animal and environmental health via the One Health multiple-sector initiative.

There is already action on many of these fronts. Organizations around the globe have long worked to halt wildlife trafficking and encouraged governments and communities to sustainably manage natural areas and conserve crucial habitats. Recently, a coalition of public health and environmental organizations—including CEPF founding donor Conservation International and CEPF conservation partners World Resources Institute and Wildlife Conservation Society—formed Preventing Pandemics at the Source to apply a more holistic approach to the pandemic threat, pursuing policies, awareness and funding for preventative action.

The global community is, however, still falling short when it comes to allocating the resources required for these types of practical actions to be taken well before a crisis such as the current pandemic.

CEPF's grantees and other civil society organizations continue their efforts to conserve the world's biodiversity and prevent the environmental conditions that enable zoonotic diseases. They have proven methods for protecting and restoring habitats that provide a buffer between humans and wild animals and offer other vital services such as fresh water, clean air and food. Many organizations are collaborating with governments to thwart the dangerous and often illegal trade in wild animals. These groups are among the heroes in the struggle against pandemics.

For a relatively low cost, the international community can empower these champions of a healthy world by significantly increasing the resources devoted to conserving biodiversity. With appropriate levels of funding, the return on investment for the global community includes fewer pandemics, healthier water, richer soils, climate regulation and much more—it's an incredible bargain.

# The Goal

Empowering locally led conservation of biodiversity hotspots—some of the world's most biologically rich yet threatened ecosystems.

Black-bellied terns (*Sterna acuticauda*), Ayeyarwady River, Myanmar. © Naing Lin/WCS Myanmar

**Donor partnership:**

Since 2000, CEPF has been bringing together donors to conserve biodiversity, strengthen civil society and support sustainable development.

Visitor with guide, Corosha, Peru. © Michael Tweddle

**Focused investment:**

On the basis of an assessment of opportunities and threats, CEPF donor partners choose which biodiversity hotspots to invest in as funding becomes available.

Sangihe Scops-owl (*Otus collaris*), Sangihe Island, Indonesia. © Rifky/Rekam Nusantara Foundation

**Participatory priority-setting:**

Grant-making is guided by ecosystem profiles—analyses of the biodiversity and socio-economic conditions in each hotspot that are produced by, and in consultation with, local stakeholders.

Flora & Fauna International staff and community conservation team discuss activities at Khau Ca Species and Habitat Conservation Area, Vietnam. © FFI/Nguyen Van Truong

A new species of Dwarf iguana discovered in Cordillera de Colan, Peru. © Pablo J. Venegas

**Local management:**

CEPF partners with a regional implementation team in the hotspot to help shepherd the investment and build local conservation leadership.

Discovering loggerhead turtle nest at Farwa, Libya, in the Mediterranean Basin Biodiversity Hotspot. © CEPF Med

**Grants to civil society:**

Civil society entities—including nongovernmental organizations, communities, Indigenous peoples groups, universities and small businesses—apply for grants that are awarded on a competitive basis for projects that contribute to CEPF's conservation strategy.

Members of a Kalunga community hold up educational posters, Brazil. © Associação Quilombo Kalunga (AQK)

**Enduring conservation:**

Projects funded by CEPF add up to a portfolio of complementary conservation actions addressing critical priorities while also building local conservation communities that will continue to lead protection of the hotspots after CEPF funding is completed.

Kpo Mountains, Liberia. © Trond Larsen

**Achieving global goals:**

The results achieved by CEPF grantees complement governments' efforts to meet targets related to the U.N.'s Convention on Biological Diversity (the Aichi Targets), Framework Convention on Climate Change, and Sustainable Development Goals.

## A Healthy Future Requires a Biodiverse World

Governments can only achieve their goals with nature—CEPF can help.

Carlos Manuel Rodriguez.  
© O. Langrand

by Carlos Manuel Rodriguez

CEO AND CHAIRPERSON, GLOBAL ENVIRONMENT FACILITY

As a Costa Rican and former minister of environment for the country, I am passionately proud of Costa Rica's role as a global leader in conservation and sustainable development. Our people understood early on that nature and human well-being go hand in hand—that you don't have to choose one or the other.

I first heard of the Critical Ecosystem Partnership Fund in 2003, when I was serving as minister of environment. I was informed by Conservation International's Costa Rica office that CEPF wanted to contribute to conserving the Mesoamerica Biodiversity Hotspot through grants to civil society, supporting projects that would help the countries of the hotspot, including Costa Rica, implement their conservation plans. And I learned that the fund's grant-making was organized around a science-based, stakeholder-driven strategy in the form of its ecosystem profile. I could see that was an innovative and promising approach.

At that time, Costa Rica was ahead of most countries in valuing and acting on conservation, and it was one of the first countries in the developing world to have a strategy for addressing conservation gaps—areas of high biodiversity lying outside the protected-area system. Costa Rica also was unusual in that the government was already collaborating with civil society organizations to implement conservation. But we were happy to gain a new partner in these pursuits.

The cooperative efforts among CEPF, CEPF's civil-society grantees and the government proved very successful, and CEPF became part of the groundbreaking effort that Costa Rica initiated to consolidate, amplify and change the economics around nature conservation. When you consider Costa Rica's conservation success story, you need to see CEPF inside that story.

It was clear to me back in the early days of my acquaintance with CEPF that other countries, particularly those with less-developed conservation communities, needed such a partner. The trust and collaboration that CEPF nurtures between civil society and government is beneficial to all involved. And since that time, CEPF has expanded its reach, having provided US\$255 million to nearly 2,500 grantees in 105 of the developing and transitional countries and territories of the world's biodiversity hotspots. Results from those grants include more than 15 million hectares of protected area, more than 50 million hectares of Key Biodiversity Areas with strengthened management, and support to more than 900 species on the IUCN Red List of Threatened Species.

Now, from my view as CEO and chairperson of the Global Environment Facility (GEF)—one of CEPF's six global donors—the need is even clearer and more urgent. This year, we may have a landmark political decision to protect 30% of the world's oceans and land, a target that is expected to emerge from the 2021 conference of the parties of the U.N. Convention on Biological Diversity.

This goal is intended to address not only the current biodiversity crisis, but also the climate crisis, as it is estimated that protecting, restoring and sustainably managing natural ecosystems could account for at least 30% of global action needed to avoid the worst climate scenarios. It also has everything to do with the global recovery from COVID-19—an extreme example of what can result from humans disrupting nature's integrity.

Achieving this worthy goal requires not just more funding, but also focus on conservation approaches that have proven effective. We know what has worked and what has not, and based on that knowledge, we need to make strategic investments. In that context, the GEF looks at CEPF as a strong partner with successful methods for empowering civil society's contribution to conservation.

While this is a time of uncertainty, loss and tremendous challenge, it also presents an opportunity for what we call a green-blue recovery—that is, one based on conserving ecosystems on land and in the oceans. Supporting grassroots conservation must be part of building back better. The GEF is ready and eager to collaborate with CEPF and other partners to help the world's governments meet global environmental obligations and construct a stable, healthy, nature-based future for their people.

## THE PARTNERSHIP

### L'AGENCE FRANÇAISE DE DÉVELOPPEMENT

L'Agence Française de Développement (the French Development Agency) is a financial institution that is at the heart of France's Development Assistance Policy. It supports a wide range of economic, social and environmental projects in the French overseas territories and in 115 countries. [www.afd.fr](http://www.afd.fr)

### CONSERVATION INTERNATIONAL

For over 30 years, Conservation International has worked to spotlight and secure the critical benefits that nature provides to humanity. Combining fieldwork with innovations in science, policy and finance, we've helped protect more than 6 million square kilometers (2.3 million square miles) of land and sea across more than 70 countries. Today, with offices in more than two dozen countries and a worldwide network of thousands of partners, our reach is truly global. [www.conservation.org](http://www.conservation.org)

### THE EUROPEAN UNION (EU)

Comprising 27 member countries, the European Union is the largest single provider of development aid in the world. The EU development policy recognizes biodiversity as a crucial element for human well-being through the production of food, fish, fuel, fiber and medicines; the regulation of water, air and climate; and the maintenance of land fertility. Through EU International Cooperation and Development, the EU invests in biodiversity and development projects in more than 100 countries. <https://ec.europa.eu/international-partnerships/home>

### THE GLOBAL ENVIRONMENT FACILITY (GEF)

The Global Environment Facility is the world's largest public funder of projects to improve the global environment. The GEF unites 183 member governments together with leading international development institutions, civil society organizations and the private sector in support of a common global environmental agenda. [www.thegef.org](http://www.thegef.org)

### THE GOVERNMENT OF JAPAN

The Government of Japan is one of the largest providers of development assistance for the environment. Japan seeks constructive measures and concrete programs to preserve unique ecosystems that provide people with important benefits and help reduce poverty. [www.env.go.jp/en](http://www.env.go.jp/en)

### THE WORLD BANK

With 189 member countries, staff from more than 170 countries, and offices in over 130 locations, the World Bank Group is a unique global partnership: five institutions working for sustainable solutions that reduce poverty and build shared prosperity in developing countries. [www.worldbank.org/en/who-we-are](http://www.worldbank.org/en/who-we-are)

## CEPF AND GLOBAL TARGETS

CEPF-funded projects contribute to many global targets for biodiversity and sustainable development.

### Aichi Biodiversity Targets

#### TARGET \ 1

By 2020, at the latest, people are aware of the values of biodiversity and the steps they can take to conserve and use it sustainably.

#### TARGET \ 2

By 2020, at the latest, biodiversity values have been integrated into national and local development and poverty reduction strategies and planning processes and are being incorporated into national accounting, as appropriate, and reporting systems.

#### TARGET \ 3

By 2020, at the latest, incentives, including subsidies, harmful to biodiversity are eliminated, phased out or reformed in order to minimize or avoid negative impacts, and positive incentives for the conservation and sustainable use of biodiversity are developed and applied, consistent and in harmony with the Convention and other relevant international obligations, taking into account national socioeconomic conditions.

#### TARGET \ 4

By 2020, at the latest, governments, business and stakeholders at all levels have taken steps to achieve or have implemented plans for sustainable production and consumption and have kept the impacts of use of natural resources well within safe ecological limits.

#### TARGET \ 7

By 2020, areas under agriculture, aquaculture and forestry are managed sustainably, ensuring conservation of biodiversity.

#### TARGET \ 9

By 2020, invasive alien species and pathways are identified and prioritized, priority species are controlled or eradicated, and measures are in place to manage pathways to prevent their introduction and establishment.

#### TARGET \ 11

By 2020, at least 17 percent of terrestrial and inland water, and 10 percent of coastal and marine areas, especially areas of particular importance for biodiversity and ecosystem services, are conserved through effectively and equitably managed, ecologically representative and well-connected systems of protected areas and other effective area-based conservation measures and integrated into the wider landscapes and seascapes.

#### TARGET \ 12

By 2020, the extinction of known threatened species has been prevented and their conservation status, particularly of those most in decline, has been improved and sustained.

#### TARGET \ 20

By 2020, at the latest, the mobilization of financial resources for effectively implementing the Strategic Plan for Biodiversity 2011–2020 from all sources, and in accordance with the consolidated and agreed process in the Strategy for Resource Mobilization, should increase substantially from the current levels. This target will be subject to changes contingent to resource needs assessments to be developed and reported by Parties.

Emerald tree skink (*Lamprolepis smaragdina*), Flores Island, Indonesia. © Riza Marlon

### UN Sustainable Development Goals

#### GOAL 2 \ ZERO HUNGER

End hunger, achieve food security and improved nutrition and promote sustainable agriculture.

#### GOAL 4 \ QUALITY EDUCATION

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

#### GOAL 5 \ GENDER EQUALITY

Achieve gender equality and empower all women and girls.

#### GOAL 6 \ CLEAN WATER AND SANITATION

Ensure availability and sustainable management of water and sanitation for all.

#### GOAL 8 \ DECENT WORK AND ECONOMIC GROWTH

Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

#### GOAL 12 \ RESPONSIBLE CONSUMPTION AND PRODUCTION

Ensure sustainable consumption and production patterns.

#### GOAL 13 \ CLIMATE ACTION

Take urgent action to combat climate change and its impacts.

#### GOAL 14 \ LIFE BELOW WATER

Conserve and sustainably use the oceans, seas and marine resources for sustainable development.

#### GOAL 15 \ LIFE ON LAND

Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss.

#### GOAL 16 \ PEACE, JUSTICE AND STRONG INSTITUTIONS

Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels.

# year in review

Sincere thanks to a long-time CEPF supporter

By Olivier Langrand  
CEPF EXECUTIVE DIRECTOR

## Congratulations to Jennifer Morris in her new role

Jennifer Morris started her tenure with Conservation International (CI) in 1998, two years before CEPF was founded by CI, the World Bank and the Global Environment Facility.

As CEPF evolved over the years, Jennifer was there, first as a colleague and leader of collaborating CI finance programs, through her multiple roles in CI's leadership, and eventually as president of CI and a member of the CEPF Donor Council. Over the years, she served as an invaluable counselor to and advocate for CEPF, helping guide its strategies and build its partnerships.

Jennifer Morris and friends in Bhutan. © O. Langrand

When, in May of 2020, Jennifer took on a new challenge as CEO of The Nature Conservancy, we at CEPF were conflicted. We were sorry to see her depart from CI and the CEPF donor family, but we also could see the exciting potential Jennifer's wisdom, creativity and energy bring to such an important partner in the effort to conserve the world's biodiversity. We know how fortunate The Nature Conservancy is to have her at the helm, and we are eager to continue working together to empower civil society organizations around the globe.

CEPF feels fortunate that, in terms of Jennifer's role on the Donor Council, she has passed the baton to CI's CEO, M. Sanjayan. We are grateful to CI for continuing its support and guidance.

We share our sincerest thanks to Jennifer for being such an important part of CEPF, and we congratulate Jennifer on her bright future at The Nature Conservancy!

Participants in CEPF's mid-term assessment for the Guinean Forests investment. © FFI

October 2019

## Guinean Forests mid-term meeting

CEPF's current five-year, US\$10.1 million investment in the Guinean Forests of West Africa Biodiversity Hotspot celebrated its halfway point by gathering grantees to discuss progress, priorities, lessons and opportunities.

Participants from 34 CEPF grantees from eight countries came together—along with CEPF staff and regional implementation team members—in Monrovia, Liberia, for a three-day workshop. Representatives of CEPF's global donors also attended the event.

The primary focus of the workshop was the concept of "mainstreaming" biodiversity conservation into public policies and the private sector, an important part of CEPF's strategy for the hotspot. A concurrent two-day workshop was held with stakeholders, including representatives from the government, donors, and the mining and forestry commodities sectors. Grantees had the opportunity to meet with these stakeholders to discuss working together.

February 2020

## First Indigenous and Community Conserved Area in Brazil

The Kalunga Quilombo community became Brazil's first Indigenous and Community Conserved Area through the efforts of Associação Quilombo Kalunga, a CEPF grantee in the Cerrado Biodiversity Hotspot.

It is difficult for traditional communities to gain recognition of their territories in Brazil, leaving them vulnerable to land grabs. This designation provides protections for the 260,000-hectare territory that is shared by 1,600 families. The community has committed to conserving the incredible biodiversity found on their land.

March 2020

## New Ph.D. adds to Comoros' conservation leadership

Amelaid Houmadi outside the Université of d'Antananarivo, Madagascar. © Dahari

Amelaid Houmadi, the Comorian ecology team leader for CEPF grantee Dahari, successfully defended his Ph.D. at the Université of d'Antananarivo, Madagascar, on the topic of terrestrial conservation priorities on the island of Anjouan, Comoros. The Ph.D. research was funded by CEPF through its investment in the Madagascar and the Indian Ocean Islands Biodiversity Hotspot and used data collected during a related project. There are few doctorates in the field of ecology in the Comoros, making this an important result for the country.

The analysis of species distribution and suitable habitat modelling for key animal species on Anjouan enabled the identification of areas important for the conservation of endangered endemic birds, reptiles and mammals. The final results identified a conservation priority area that covered

22.6% of the total area of the island. The resulting maps allow stakeholders to decide where and how to act to conserve biodiversity and are a key tool for decision-making on reforestation activities and agroforestry management.

Dahari has been working in the Moya Forest area on Anjouan to establish a landscape management model for livelihood development and biodiversity conservation in conjunction with local communities.

## Twelve new amphibian species discovered

In the Tropical Andes Biodiversity Hotspot, CEPF-funded field studies conducted in southern Ecuador by Universidad Técnica Particular de Loja had exciting results. In the 6.6-hectare Abra de Zamora Key Biodiversity Area, researchers found

*Pristimantis samaniegoi*, a new-to-science species found in Abra de Zamora, Ecuador. © UTPL

27 amphibian species, 12 of which were new to science. A single place with such high amphibian diversity is rare. The findings led to discussions with local stakeholders and, ultimately, the inclusion of Abra de Zamora in the declaration of a new municipal protected area for biodiversity and watershed conservation for the city of Loja.

April 2020

## Adjusting to help after cyclone

▶ Tropical Cyclone Harold made landfall as a Category 5 storm on Vanuatu's Espiritu Santo Island on 6 April. One-third of the country's 270,000 people were affected, and on many islands, more than half of the dwellings were damaged. CEPF amended two active grants, to Live & Learn Vanuatu and the Edenhope Foundation, respectively, to enable them to deliver support for the rebuilding of water supply systems and emergency shelters.

Community members unload emergency supplies delivered by boat, Espiritu Santo, Vanuatu. © Dr. Christopher Bartlett, independent climate expert, Vanuatu

May 2020

## CEPF names its Hotspot Heroes

▶ In conjunction with its 20th anniversary, CEPF recognized 10 Hotspot Heroes—grantees selected for their outstanding contributions to conservation of the world's biodiversity hotspots. One hero was chosen for each biodiversity hotspot where CEPF was actively investing.

These heroes represent the many hard-working, dedicated people who are helping ensure the future of biodiversity hotspots and the communities who depend on them for fresh water, food, fuel, climate change mitigation and more. Although plans for an event to celebrate the heroes were put on hold due to the pandemic, an online celebration is anticipated in September 2021.

May 2020 (Continued)

## Grantees help communities facing pandemic

▶ The COVID-19 pandemic required the CEPF Secretariat, its regional implementation teams and its grantees to work together to address the unprecedented situation. The Tropical Andes Biodiversity Hotspot provides several examples of such efforts.

Delivery of supplies to the Agroecological Producers Association Buenos Aires del Parcos, Peru. © Practical Action

- Along the Ecuador-Colombia border, Indigenous communities have had long-standing issues with drug traffickers and illegal gold miners and have suffered violence and murder. The pandemic introduced yet another threat. CEPF partnered with three Awá indigenous organizations—the Unidad Indígena del Pueblo Awá, the Resguardo Pialapí Pueblo Viejo and Centro Awá Pambilar—to help protect the communities. With CEPF support, the communities obtained COVID-19 personal protective equipment, secured communications devices to strengthen coordination, and received information in the Awapit language on how to prevent the spread of the virus. A highlight was the installation of a radio antenna at La Planada Nature Reserve that allowed the transmission of internet and cell phone signals to Awá communities, which is indispensable for securing the territory and emergency communications.
- In Peru, CEPF grantee Practical Action had been working to protect threatened bird species in the district of San José de Lourdes but shifted to providing seeds and food packages to the isolated community.
- A small grant to Awajún Indigenous authorities managing the Chayu Nain Communal Reserve in northern Peru allowed communities to obtain disinfectant, masks and other supplies as well as fishing equipment.

Other grantees used CEPF funds to purchase sanitary supplies and equipment for their offices to prevent the spread of the virus.

Ala Archa National Park,  
Kyrgyzstan.  
© O. Langrand

## Mountains of Central Asia conservation moves ahead

▶ As part of a five-year, US\$8 million investment in the Mountains of Central Asia Biodiversity Hotspot, CEPF's regional implementation team (RIT), led by WWF-Russia, issued the first calls for letters of inquiry for projects in Afghanistan, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan. By the end of the fiscal year (30 June), the RIT was in negotiations to award 13 small grants and was reviewing 45 large-grant applications.

Murchison Falls  
National Park, Uganda.  
© O. Langrand

## Eastern Afrotropical investment completed

▶ CEPF completed its investment in the Eastern Afrotropical Biodiversity Hotspot after seven years and nearly US\$12 million awarded in grants to organizations in 13 countries. CEPF funds reached 115 grantees, 85 of which are based in the region.

Results included:

- Improved management of 58 Key Biodiversity Areas covering 4.8 million hectares.
- Within that total, creation or expansion of 11 protected areas covering 1.4 million hectares.
- Threat reduction for 27 globally threatened species and discovery of six new ones.
- Provision of noncash benefits—such as access to clean water and improved food security—to more than 200,000 people.
- Increase in the income of more than 26,000 people from livelihood activities such as beekeeping and sustainable agriculture.

## First grants made from CEPF to civil society in Palestine

*Iris lortetii*  
data collection,  
Nablus, Palestine.  
© Rana Jamous

▶ As part of its conservation efforts in the Mediterranean Basin Biodiversity Hotspot, CEPF made its first-ever grant awards to organizations in Palestine—the Palestinian Wildlife Society and Nature Palestine Society. Palestine is home to 14 Key Biodiversity Areas. The projects focus on protecting threatened plants.

June 2020

## Indo-Burma: One investment complete and new one planned

▶ A seven-year investment in the Indo-Burma Biodiversity Hotspot concluded with a total of US\$15.4 million in funding to 189 projects. Meanwhile, CEPF developed a new ecosystem profile that assessed the current context for conservation and will guide future investment. Based on the new profile, the CEPF Donor Council approved in November 2020 a new five-year commitment of US\$10 million for conservation of the hotspot.

Key results from the investment completed in 2020 include:

- Long-term conservation programs established for core populations of 31 priority species.
- Five pilot models for biodiversity-friendly production established, including rice farming, medicinal plant collection and cement manufacture.
- Benefits gained by 162 local communities, including improved land tenure, food security and access to ecosystem services such as fresh water and food.

- Protection and management strengthened for 1.4 million hectares within 55 Key Biodiversity Areas.
- Initiatives to reduce wildlife trafficking across the Cambodia-Vietnam, Lao PDR-Vietnam, Vietnam-China and Myanmar-China borders resulted in seizures of major shipments of ivory, pangolin scales and other illegally traded products and in public commitments by private companies of zero tolerance toward illegal wildlife trade.
- Establishment or strengthening of 51 civil society networks, enabling collective responses to priority and emerging threats.
- Strengthened capacity of 135 civil society organizations working on conservation.

CEPF's previous ecosystem profile for Indo-Burma was used by other funders to guide an additional US\$30 million for conservation.

Loggerhead turtle (*Caretta caretta*), Cabo Verde. © Joana Hancock

June 2020 (Continued)

## Loggerhead turtles have a boom year in Cabo Verde

▶ In Cabo Verde, part of the Mediterranean Basin Biodiversity Hotspot, the number of loggerhead turtles that came to shore and the number of nests reached record levels. More than 100,000 nests were counted in 2018 for the whole of Cabo Verde. The official 2020 count came in at over 170,000 nests.

In Sal and Santa Luzia, where CEPF supports partners Projeto Biodiversidad and Biosfera, more than 2,500 nests have been recorded. In addition, more than 88,000 nests were recorded on Boa Vista, where CEPF previously supported turtle conservation efforts.

Years of work by nongovernmental organizations to protect the turtles and their nesting is believed to have played an important role in this growth.

## Five-year investment completed in Wallacea

▶ CEPF's US\$6.85 million investment in the Wallacea Biodiversity Hotspot, which consists of islands in the central part of Indonesia and Timor-Leste, came to a conclusion. The regional implementation team Burung Indonesia and the CEPF Secretariat awarded 109 grants to 68 organizations. Work took place in 43 Key Biodiversity Areas and provided benefits such as improved food security and access to fresh water to 169 communities.

Results include:

- Threats were reduced to 18 priority species.
- 258,000 terrestrial hectares and 1 million marine hectares were placed under formal protection.
- More than 521,000 hectares of forest and 36,000 hectares of fisheries are under improved management.

Burung engaged national government agencies, particularly for protected areas and for fisheries, and provincial governments with the message that CEPF grantees, working in relatively small areas, were doing work that would help the government achieve its own goals and that these investments could be built upon and the results multiplied tenfold. For example, several thousand hectares of marine protected areas created by grantees in Central Sulawesi became seeds for the provincial government's creation of the 876,000-hectare Banggai Dalaka Marine Protected Area.

November 2019

▶ As a result of Solomon Islands' forests being under severe threat from logging, the nation declared 800 hectares of Sirebe tribal land as the country's first protected area covering tropical forests. This tribal area is located in the Mount Maetambe-Kolombangara River Key Biodiversity Area (KBA), one of CEPF's priority sites in the East Melanesian Islands Biodiversity Hotspot. The area is home to 19 of the 21 frog species found in the Solomon Islands, as well as many bird, mammal and reptile species.

Presentation of the protected area registration certificate to the Sirebe Tribe, Solomon Islands. © NRDF 2019

The Sirebe Tribe will also be the first tribe in the country to trade carbon credits. CEPF grantee Natural Resources Development Foundation (NRDF) has been working with the Sirebe Tribe to introduce the plan so that the community can sell carbon offsets and conservation credits, and switch from forest clearance to a conservation model. CEPF has helped support the various tribes in the KBA since 2013 through the work of Ecological Solutions Solomon Islands and NRDF.

January 2020

▶ Peru's government announced the creation of the Bosque Montano de Carpish Regional Conservation Area. The conservation area will protect 50,559 hectares along the watershed of the Peruvian Amazon, home to an array of birds and to plant species that are native to Peru.

The effort to win the designation was spearheaded by CEPF grantee Nature and Culture International and local community leaders. Supporters are hopeful that the protected status will draw tourists and provide a source of revenue for local communities.

March 2020

▶ The Myanmar government established the 156,280-hectare Imawbum National Park. It protects the only known population of the Critically Endangered Myanmar snub-nosed monkey (*Rhinopithecus strykeri*), which was unknown to science until its discovery in 2010. The new park is the culmination of years of effort by Fauna & Flora International (FFI), in partnership with the Myanmar Forest Department and local communities. CEPF supported the community consultations and agricultural land mapping necessary to verify the boundary for the park. CEPF is supporting FFI and its partners to develop a management plan for the new park.

## A TRIBUTE

“His sincere interest in making the world better, combined with his keen understanding of finance, development and the role of civil society, set CEPF and its grantees on a path to success. We owe him a debt of gratitude for his leadership and commitment to conservation.”

— Olivier Langrand CEPF's executive director

# James D. Wolfensohn

## Saying goodbye to one of CEPF's founders

James D. Wolfensohn, former World Bank president who was one of CEPF's founders, passed away on 25 November 2020 at age 86. Mr. Wolfensohn and Conservation International founder and former CEO Peter Seligmann launched CEPF in 2000, when Mr. Wolfensohn was president of the World Bank.

“Mr. Wolfensohn was essential to the establishment of CEPF,” said Olivier Langrand, CEPF's executive director. “His sincere interest in making the world better, combined with his keen understanding of finance, development and the role of civil society, set CEPF and its grantees on a path to success. We owe him a debt of gratitude for his leadership and commitment to conservation.”

Mr. Wolfensohn lived an exceptional life. From a modest upbringing in Australia, he rose to the top of international finance. He served as the president of the World Bank for 10 years, where he focused on poverty alleviation and waged a campaign against corruption. He was an Olympic fencer and an accomplished cellist, and he served as an officer in the Royal Australian Air Force. As chairman for New York's Carnegie Hall and Washington, D.C.'s Kennedy Center, he played an important role in strengthening the finances of the revered arts venues.

The idea for CEPF grew out of the friendship between Mr. Wolfensohn and Mr. Seligmann. During an interview CEPF conducted with the two men in July 2010, Mr. Seligmann said they met at a dinner hosted by actor Harrison Ford. “I was really attracted, Jim, to your personal interest and passion for doing the right thing and finding the right path, and I thought, here's someone who I could not only be a friend with, but someone who I could really partner with.” On a subsequent fly-fishing trip in Wyoming, they formed the idea for a fund that would conserve the world's biodiversity hotspots and strengthen civil society. They founded CEPF with US\$25 million commitments each from the World Bank, Conservation International and the Global Environment Facility, and the partnership grew from there.

“I knew the idea of the partnership was important because for me, it was probably the first of the new visible partnerships I had with civil society, when the bank was wholly distrusted by civil society, and what I was trying to do was to say that it was much better if we worked together,” said Mr. Wolfensohn in the July 2010 interview.

He went on to serve multiple terms as the chairperson for the CEPF Donor Council, helping guide the fund through growth in its partnership and changes in the environmental threats and opportunities in the world's biodiversity hotspots.

He and his wife Elaine, who passed away in August 2020, were involved in many philanthropic and service endeavors, and their love of nature was reflected in their commitments, including Mr. Wolfensohn's service as board member and board member emeritus for Conservation International.

They will be missed, but their positive effect on the world will be felt for generations to come.

# HOTSPOTS

Biodiversity Hotspots = Earth's most biologically rich—yet threatened—terrestrial regions.

### Biodiversity Hotspots Where CEPF Was Active During the Fiscal Year

1. Cerrado
2. East Melanesian Islands
3. Eastern Afromontane
4. Guinean Forests of West Africa
5. Indo-Burma
6. Madagascar and the Indian Ocean Islands
7. Mediterranean Basin
8. Mountains of Central Asia
9. Tropical Andes
10. Wallacea

### Past CEPF Investment

11. Atlantic Forest
12. Cape Floristic Region
13. Caribbean Islands
14. Caucasus
15. Coastal Forests of Eastern Africa
16. Himalaya
17. Maputaland-Pondoland-Albany
18. Mesoamerica
19. Mountains of Southwest China
20. Philippines
21. Polynesia-Micronesia

### Not Eligible for CEPF Investment\*

30. California Floristic Province
31. Forests of East Australia
32. Japan
33. New Caledonia
34. New Zealand
35. North American Coastal Plain
36. Southwest Australia

### Eligible for CEPF Investment

26. Chilean Winter Rainfall-Valdivian Forests
27. Horn of Africa
28. Irano-Anatolian
29. Madrean Pine-Oak Woodlands

To qualify as a biodiversity hotspot, an area must meet two strict criteria:

- Contain at least 1,500 species of vascular plants found nowhere else on Earth (known as "endemic" species).
- Have lost at least 70 percent of its primary native vegetation.

CEPF awards grants to civil society working on conservation in developing countries within the biodiversity hotspots.

There are 36 hotspots around the globe. Some are contained in a single country, such as Japan. Others include parts of several countries, such as the Mediterranean Basin Hotspot, which encompasses portions of 34 countries and territories.

\* To receive CEPF support, countries must be World Bank borrowing member countries. If a hotspot does not include any of these countries, it is not eligible for support.

## CEPF APPROVED GRANTS

1 July 2019–30 June 2020 Grants are reported on the basis of the effective date of the agreement.

### Cerrado

**STRATEGIC DIRECTION 2.** Support the creation/expansion and effective management of protected areas in the priority corridors.

#### Associação Mineira de Defesa do Ambiente (AMDA) US\$101,247

Study of Expansion of Protected Areas in the Mosaic Sertão Veredas Peruaçu, Brazil

#### Centro de Trabalho Indigenista (CTI) US\$47,739

Poke'ixa Úti: Protecting Our Territory for the Autonomy of the Terena People

#### Fundação Pró Natureza (Funatura) US\$242,980

Private Reserves in the Cerrado

**STRATEGIC DIRECTION 3.** Promote and strengthen supply chains associated with the sustainable use of natural resources and ecological restoration in the hotspot.

#### Fundação de Empreendimentos Científicos e Tecnológicos (Finatec) US\$72,347

Interactive Technologies Applied to Environmental Restoration in Cerrado, Brazil

**STRATEGIC DIRECTION 5.** Support the implementation of tools to integrate and to share data on monitoring to better inform decision-making processes in the hotspot.

#### Fundação de Apoio e Desenvolvimento da Universidade de Mato Grosso (Fundação Uniselva) US\$186,648

Multiscale Water Quality Monitoring in the São Lourenço River Basin, Brazil

Black-tailed marmoset (*Mico melanurus*), Brazil. © O. Langrand

**STRATEGIC DIRECTION 6.** Strengthen the capacity of civil society organizations to promote better management of territories and of natural resources and to support other investment priorities in the hotspot.

#### Centro de Agricultura Alternativa do Norte de Minas (CAA) US\$150,000

Preserving the Cerrado of North Minas Gerais State in Brazil Through Sustainable Management of Traditional Territories

#### Cooperativa dos Agricultores Familiares e Agroextrativistas Grande Sertão Ltda. US\$48,986

Grande Sertão: Extractivism, Conservation and Income Generation in the Cerrado, Brazil

#### Instituto Ekos Brasil US\$121,079

Accelerating Sustainable Tourism in the Environmental Protection Area and Peruaçu Caves National Park, Brazil

#### Mongabay US\$71,290

Disseminating Information About Cerrado Hotspot Conservation Models and Threats

#### Sindicato dos Trabalhadores Rurais de Riacho dos Machados US\$47,487

Taking Care of the Cerrado and Promoting Life

#### WWF-Brasil US\$140,000

Establishing a Network to Safeguard Brazilian Cerrado Protected Areas

### East Melanesian Islands

**STRATEGIC DIRECTION 1.** Empower local communities to protect and manage globally significant biodiversity at priority Key Biodiversity Areas underserved by current conservation efforts.

#### Gizo Women in Business Development Incorporation US\$19,000

Agroforestry and Feasibility Study on Downstream Processing of Fruits on Kolombangara Island and Beekeeping on Ghizo Island, Solomon Islands

#### University of Rochester US\$60,357

Establishing a Protected Area in Solomon Islands' East Makira Key Biodiversity Area

**STRATEGIC DIRECTION 2.** Integrate biodiversity conservation into local land-use and development planning.

#### Papua New Guinea Forest Certification Incorporated US\$19,870

Promoting Sustainable Development and Responsible Production Across Papua New Guinea's Natural Resource Sectors

#### Solomon Islands Community Conservation Partnership US\$20,000

Establishing Ngali Nut Agroforestry for Forest Conservation in the Marovo-Kavachi Key Biodiversity Area, Solomon Islands

#### Vanuatu Environmental Law Association Committee US\$108,482

Strengthening Environmental Legal Education and Capacity in Vanuatu

**STRATEGIC DIRECTION 3.** Safeguard priority globally threatened species by addressing major threats and information gaps.

#### Oceania Ecology Group US\$19,990

Species Champions and Caretakers for the Giant Rats of Bougainville, Guadalcanal and Vangunu Islands

Forest inventory, Solomon Islands. © NRDF

#### Vanuatu Environmental Science Society US\$100,112

Identifying and Protecting Important Habitat for the Fiji Mastiff Bat and the Banks Flying Fox in Vanuatu

**STRATEGIC DIRECTION 4.** Increase local, national and regional capacity to conserve biodiversity through catalyzing civil society partnerships.

#### Baru Conservation Alliance US\$19,180

Strengthening the Baru Conservation Alliance for Conservation Management in Kwaio, Solomon Islands

#### Eco-livelihood Development Associates US\$20,000

Strengthening the Institutional Capacity of Eco-livelihood Development Association, Vanuatu

#### Mai Maasina Green Belt US\$20,000

Developing the Mai-Maasina Green Belt for Malaita, Solomon Islands

#### Natural Resources Development Foundation US\$17,695

Training and Capacity Building for the Barekasi Tribal Association in Vella Lavella, Solomon Islands

#### New Guinea Binatang Research Center US\$88,920

Capacity Building for Rangers and Conservationists in Papua New Guinea

#### NGO PROmotion Incorporated US\$19,961

Strengthening Civil Society Organizations to Support Biodiversity Conservation in Bougainville, Papua New Guinea

#### Solomon Islands Environmental Lawyers Association US\$19,979

Improving Community Access to Environmental Legal Education in Key Biodiversity Areas in Solomon Islands

## Eastern Afromontane

**STRATEGIC DIRECTION 1.** Mainstream biodiversity into wider development policies, plans and projects to deliver the co-benefits of biodiversity conservation, improved local livelihoods and economic development in priority corridors.

### Sustainable Natural Resources Management Association (SUNARMA) US\$31,246

Wof Washa Community-Based Ecotourism Project – Additional Support

**STRATEGIC DIRECTION 2.** Improve the protection and management of the Key Biodiversity Area network throughout the hotspot.

### National Museums of Kenya US\$14,817

Rapid Biodiversity Assessment for Lake Ol' Bolossat Key Biodiversity Area, Kenya

**STRATEGIC DIRECTION 3.** Initiate and support sustainable financing and related actions for the conservation of priority Key Biodiversity Areas and corridors.

### ZESMAN Consultancy US\$10,920

Organizing Workshop in Ethiopia for All Previous CEPF Grantees

Harvesting honey in Misuku Hills Forest Reserves Key Biodiversity Area, Malawi.  
© Maynard Nyirenda

## Guinean Forests of West Africa

**STRATEGIC DIRECTION 1.** Empower local communities to engage in sustainable management of 40 priority sites and consolidate ecological connectivity at the landscape scale.

### Forêts et Développement Rural (FODER) US\$239,951

Support to the Conservation and the Participative Management of the Tchabal Mbabo Forest Massif in Cameroon

**STRATEGIC DIRECTION 2.** Mainstream biodiversity conservation into public policy and private sector practice in the nine conservation corridors, at local, sub-national and national levels.

### Fauna & Flora International US\$36,131

Capacity and Tools for Biodiversity Mainstreaming in the Guinean Forests of West Africa Biodiversity Hotspot

Fishermen, Robertsport, Liberia.  
© Michael Christopher Brown

### Fauna & Flora International US\$249,916

Country-Specific Mentoring and Training to Strengthen Civil Society Organizations in Liberia and São Tomé and Príncipe

### Fauna & Flora International US\$49,726

Learning Exchange in the Guinean Forests of West Africa

### Tropical Biology Association US\$299,725

Enhancing Biodiversity Conservation Capacity of Civil Society Organizations in Ghana and Nigeria

### West Africa Civil Society Institute US\$300,000

Strengthening Organizations' Capacity for Effective Stakeholder Engagement in Biodiversity Conservation in Côte d'Ivoire, Guinea and Sierra Leone

## Indo-Burma

**STRATEGIC DIRECTION 1.** Safeguard priority globally threatened species by mitigating major threats.

### Wildlife Conservation Society US\$20,000

Protection of River Tern and Black-Bellied Tern in Myanmar

**STRATEGIC DIRECTION 4.** Empower local communities to engage in conservation and management of priority sites.

### Conservation International US\$180,000

Community-Based Wild-Fire Management on Cambodia's Tonle Sap Lake

### Culture and Environment Preservation Association US\$100,000

Sustainable Natural Capital Management Through Improving Biodiversity Conservation in Stung Treng Ramsar Site, Cambodia

### Fisheries Action Coalition Team US\$100,000

Strengthening Capacity of Community Fisheries to Manage Resources around Tonle Sap Lake, Cambodia

### My Village US\$150,000

Inclusive Participation of Indigenous Communities and Rural Communities in Fishery Conservation and Governance in Stung Treng Province, Cambodia

### NatureLife Cambodia Organization US\$80,000

Capacity Building and Community Protected Area Development at Stung Sen Ramsar Site, Cambodia

Ban Tha, Lao PDR.  
© O. Langrand

**STRATEGIC DIRECTION 6.** Demonstrate scalable approaches for integrating biodiversity and ecosystem services into development planning in the priority corridors.

### BirdLife International Cambodia Programme US\$180,000

Inundated Forest Conservation Through Wetland Restoration and Disease Reduction in Northeast Cambodia

### BirdLife International Cambodia Programme US\$180,000

Organic Livelihoods Conserving Cambodia's "Big Five"

### International Rivers Network US\$149,996

Minimizing Ecosystem and Community Vulnerability in Cambodia to Lower Mekong Hydropower

### Rising Phoenix Co. US\$180,000

Siamese Crocodile: Icon for the Restoration of the Sekong River, Cambodia

### Sansom Mlup Prey Organization US\$208,588

Wildlife-Friendly Community Irrigation Ponds for Climate Resilience, Habitat and Collective Management in Cambodia

### Wildlife Conservation Society US\$179,950

Pragmatic Protocols for Restoration of Ecosystem Processes in Cambodia's Wild

**STRATEGIC DIRECTION 8.** Strengthen the capacity of civil society to work on biodiversity, communities and livelihoods at regional, national, local and grassroots levels.

### Cambodia Indigenous Youth Association US\$60,000

Strengthening Indigenous Youth Participation in Protection of Cambodia's Northern Plains

### Fisheries Action Coalition Team US\$180,000

Strengthening Capacity of the Non-Governmental Organizations Coalition on Fisheries and the Coalition of Cambodia Fishers

## Madagascar and the Indian Ocean Islands

**STRATEGIC DIRECTION 1.** Empower local communities to protect and manage biodiversity in priority Key Biodiversity Areas.

### Association TOSIKA US\$195,477

Build the Resilience of Madagascar's Ibity New Protected Area through Forest Restoration, Improved Agricultural Practices and Drone Monitoring

### Babaomby Nature Conservation US\$11,811

Protecting Biodiversity Through Ecotourism in Madagascar's Ampombofofo Village

### Conservation International US\$200,000

Strengthen Marine Biodiversity Conservation from Ambodivahibe to the Antsiranana and Rigny Bay Complex in Madagascar

### Durrell Wildlife Conservation Trust US\$199,941

Mitigating the Unprecedented Loss of the Menabe Dry Forest in Madagascar

### L'association Club Botanique de Toliara US\$17,093

Know and Share Heritage Plants in Madagascar's Onilahy Basin to Support Community Conservation

### L'association d'Intervention pour le Développement et l'Environnement US\$18,986

Implement Participatory Management and Monitoring System of Coral Reef Health Status at Five Pilot Sites, Ngazidja Island, Comoros

### L'association MIHAVALO US\$18,599

Increasing Community Resilience in Madagascar's Amoron'i Onilahy Protected Area in the Face of Climate Change and Overexploitation of Forest Resources

### Les Amis de Nyombadjou US\$14,332

Strengthen the Governance Capacity of the Nyombadjou Forest and Watershed in Comoros

### Ny Tanintsika US\$190,584

Developing the Wild Silk Sector to Save Ambatofinandrahana's Tapia Forest, Madagascar

### Planet Madagascar US\$187,963

Managing Fires and Monitoring Forests in Madagascar's Ankarafantsika National Park

### Plateforme Femme Développement Durable et Sécurité Alimentaire US\$19,173

Strengthening the Capacities of Uropveni Women in Sustainable Mangrove Management

### Protection des Ressources Naturelles, de la Biodiversité, de la Santé et de la Sécurité Alimentaire US\$19,762

Improving the Co-Management Conditions of Coastal Communities in the Coastal Zone of the Colas, Fomboni-Mohéli in Comoros

### SOAMANEVA US\$16,784

Contributing to the Survival and Preservation of Sea Turtles in Madagascar's Rigny Bay

### Ter Mer Rodriguez Association US\$79,350

Increase the Biodiversity of the Gombrani Islet in Rodrigues, Mauritius, via Enhanced Conservation Practices

### Young Progress Association US\$193,652

Improving Landscape Management Using Spatial Tools and Sustainable Agricultural Practices in Madagascar

© O. Langrand

**STRATEGIC DIRECTION 2.** Enable civil society to mainstream biodiversity and conservation into political and economic decision-making.

### Strand Life Sciences Pvt. Ltd. US\$199,150

Collating and Disseminating Information on Madagascar's Terrestrial Protected Areas

**STRATEGIC DIRECTION 3.** Strengthen civil society capacity at local and regional levels through training, exchanges and regional cooperation.

## Mediterranean Basin

**STRATEGIC DIRECTION 1.** Support civil society to engage stakeholders in demonstrating integrated approaches for the preservation of biodiversity in coastal areas.

### Association de Gestion Intégrée des Ressources US\$19,956

Involve Civil Society and Fishing Community in Integrating Biodiversity Conservation in Souss Massa National Park and Tamri Key Biodiversity Area, Morocco

### Associação Projetos Biodiversidade US\$155,698

Establishing Cooperative Management of the Cabo Verde's Costa de Fragata Marine Protected Area to Conserve Sal Island's Key Biodiversity Area

### BADO Association for Environment US\$19,245

Establishing Environmental Awareness About the Importance of Libya's Farwa Marine Protected Area

### Fondation Tour du Valat US\$12,330

Monitoring the Dynamics of the Evolution of the Wetland Habitats of Sebkat Sejoui Using Geographical Information Systems, Tunisia

### Libyan Society for Birds US\$19,800

Fostering Stakeholder Participation in Preparing a Management Plan for Libya's Farwa Marine Protected Area

## CEPF FINANCIAL SUMMARY

During the 2020 fiscal year of 1 July 2019 to 30 June 2020, CEPF awarded nearly US\$12.7 million in new grants, bringing the amount it has invested in conserving critical ecosystems since 2000 to more than US\$255 million.

CEPF received revenue from multiple new donor agreements during the fiscal year. In August 2019, CEPF signed a new funding agreement with the MAVA Foundation of US\$680,000 to support the Mediterranean Basin Biodiversity Hotspot. In November 2019, CEPF signed an agreement with the Margaret A. Cargill Philanthropies for US\$2.5 million to support the Indo-Burma Biodiversity Hotspot. CEPF signed two new funding agreements in December 2020 with l'Agence Française de Développement (AFD) for 12.2 million euros from the European Union, and for 14 million euros from AFD directly. And in June 2020, CEPF signed a 20,000-euro contract related to the finalization of the Green Climate Fund proposal that was under development related to the Madagascar and the Indian Ocean Islands Biodiversity Hotspot.

By the end of the year, 2,492 grantees had received support from the fund since its inception. CEPF continued active granting in the Cerrado, East Melanesian Islands, Guinean Forests of West Africa, Madagascar and the Indian Ocean Islands, Mediterranean Basin, Mountains of Central Asia, and Tropical Andes biodiversity hotspots. Investments in the Eastern Afromontane, Indo-Burma and Wallacea biodiversity hotspots wrapped up during the fiscal year, while work was underway to update ecosystem profiles for Indo-Burma and Wallacea in anticipation of new investments. An updated ecosystem profile also was completed for the Caribbean Islands Biodiversity Hotspot while CEPF worked with the World Bank to map out a possible new investment in that hotspot.

Anjouan, Comoros. © Dahari

Awarded in fiscal year 2020

## CEPF STATEMENT OF ACTIVITY

<b>REVENUE</b>	<b>FY20</b>	<b>CUMULATIVE</b>
Grants and contributions	32,334,896	350,567,427
