

Protecting Biodiversity by Empowering People

ANNUAL
REPORT **2019**

CRITICAL | ECOSYSTEM PARTNERSHIP FUND

THE GOAL

Empowering locally led conservation of biodiversity hotspots—some of the world's most biologically rich yet threatened ecosystems.

- 3 Results
- 9 Message from the Chairperson
- 10 Message from the Executive Director
- 11 The Partnership
- 13 CEPF and Global Targets
- 15 Year in Review

- 19 CEPF and the Biodiversity Hotspots
- 21 Approved Grants
- 29 Financial Summary
- 31 Grantee Partners
- 38 Donor Council, Working Group CEPF Secretariat, and Regional Implementation Teams

CEPF'S APPROACH

DONOR PARTNERSHIP:

Since 2000, CEPF has been bringing together global and regional donors to conserve biodiversity, strengthen civil society and support sustainable development.

FOCUSED INVESTMENT:

On the basis of an assessment of opportunities and threats, CEPF donor partners choose which biodiversity hotspots to invest in as funding becomes available.

PARTICIPATORY PRIORITY-SETTING:

Grant making is guided by ecosystem profiles—analyses of the biodiversity and socio-economic conditions in each hotspot that are produced by, and in consultation with, local stakeholders. The result is a regional conservation strategy tailored to the most urgent needs, using practical solutions.

LOCAL MANAGEMENT:

CEPF partners with a regional implementation team in the hotspot to help shepherd the investment and build local conservation leadership.

GRANTS TO CIVIL SOCIETY:

Civil society entities—including nongovernmental organizations, communities, indigenous peoples groups, universities and small businesses—apply for grants that are awarded on a competitive basis for projects that contribute to CEPF's conservation strategy.

ENDURING CONSERVATION:

Projects funded by CEPF add up to a portfolio of complementary conservation actions addressing critical priorities while also building local conservation communities that will continue to lead protection of the hotspots after CEPF funding is completed.

ACHIEVING GLOBAL GOALS:

The results achieved by CEPF grantees complement governments' efforts to meet targets related to the U.N.'s Convention on Biological Diversity (the Aichi Targets), Framework Convention on Climate Change, and Sustainable Development Goals.

44.6 MILLION

Hectares of Key Biodiversity Areas with improved management

Key Biodiversity Areas (KBAs) are, simply put, the most important places for life on Earth. Defined as sites that contribute significantly to the global persistence of biodiversity, these terrestrial, freshwater and marine ecosystems are critical to the survival of species and biological diversity. They are the basic building blocks of CEPF's conservation strategies. Learn more at keybiodiversityareas.org.

The Urgent Need To Scale Up Action Is Clear

WE HAVE THE GRASSROOTS KNOWLEDGE AND LEADERSHIP TO MAKE IT HAPPEN

This report, sharing the latest results from CEPF's grantees, arrives as we are in the midst of an unprecedented global challenge, at a time when we had expected to focus primarily on the "super year for biodiversity." In many ways the coronavirus has strengthened our commitment to continue to be the best possible stewards for nature and to contribute, with our experience, to new global targets for biodiversity leading to global action.

The "super year" follows grim revelations from the global biodiversity assessment released in May 2019 by the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES). Among the findings: up to 1 million species threatened with extinction; US\$235 billion in global crop output at risk because of pollinator loss; 35% of protected areas managed by indigenous peoples under increasing pressure from extractive industries. The assessment and recent disasters such as the fires in the Amazon and Australia make our situation crystal clear: Transformative change is needed now to halt the dangerous decline in nature. We must continue and radically intensify efforts to restore natural systems we rely on for essentials such as food and water, and to help us adapt to, and mitigate, climate change.

In this landscape, CEPF offers good news: There are smart, experienced local conservation leaders around the globe ready to escalate their ongoing achievements. The CEPF model has demonstrated that with modest financial support, local nongovernmental groups can be extremely effective in delivering conservation results that benefit nearby communities, aid local and national governments, and help address global concerns.

Take as an example CEPF's portfolio of projects in the Eastern Afromontane Biodiversity Hotspot. US\$12 million in grants from 2012 to 2019, made available to 104 grantees in 13 countries yielded results including:

- **1.42 million hectares** of protected area created in countries including the Democratic Republic of Congo, Tanzania and Kenya.
- **5.26 million hectares** of Key Biodiversity Areas (KBA) with improved management in countries such as Ethiopia, Zimbabwe, Rwanda and Mozambique.
- **3 national and 66 local laws**, policies or regulations enabled in favor of biodiversity in Uganda, Tanzania, Ethiopia and more.
- **577 communities** benefiting across the hotspot.

Now, at the end of this investment, many of these grantees are ready and willing to take on more.

This points to a relatively simple step that world leaders at all levels can take immediately: **Support local civil society to expand their successes and complement the efforts of governmental stakeholders. Civil society has demonstrated impressive return on investment. It only makes sense to invest more.**

JULIA MARTON-LEFÈVRE
CHAIRPERSON,
CEPF DONOR COUNCIL

“We go out on monitoring trips to these far out places that are not easily accessible, but when you are there, you see what is being done, you see the nature around you, you see some of these key species like chimpanzees, or birds, butterflies and many more. That just makes you smile. There is so much to be done, there is no way to stop.”

Maaïke Mantén, team leader, CEPF Regional Implementation Team for the Eastern Afromontane Biodiversity Hotspot

OLIVIER LANGRAND
EXECUTIVE DIRECTOR

“Before, I could not imagine how a woman could be a ranger because I thought it was the work for men only. It has given me confidence and I can now stand and educate the community about the importance of Rugezi Marsh.”

Marie Claire Niyodusenga

Jacqueline Uwimanazahaye, left, a community ranger, and Regional Implementation Team Leader Maaïke Mantén, Rugezi Marsh, Rwanda. © CI/photo by A. W. Tordoff

Rugezi Marsh projects contribute to:

1. Conserving globally threatened species.
2. Storing carbon via peat bog.
3. Restoring and regulating flow of water.
4. Avoiding soil erosion through planting of native tree species.
5. Engaging civil society organizations in leading conservation.
6. Involving communities in conservation and sustainable development.
7. Achieving government biodiversity conservation plans.

Small Investments Yield Big Change

STRENGTHENING LOCAL GROUPS TO PROTECT ESSENTIAL ECOSYSTEMS AND BUILD A FUTURE FOR NATURE

Rugezi Marsh is a remote, lush, high-altitude wetland in Rwanda that holds great importance for people and other species. It provides and filters water needed for human consumption and hydropower, stores carbon and supports local livelihoods. It also provides a home for a wide range of species, including the **Endangered Grauer's swamp warbler** (*Bradypterus graueri*) and the **Endangered grey crowned crane** (*Balearica regulorum*).

Almost 7,000 hectares of Rugezi Marsh—which also has been designated an Important Bird Area (IBA)—have been set aside for protection. The Rwandan government named it a top conservation priority in its national biodiversity strategy. However, this wetland has been significantly degraded over time by development and unsustainable use of its resources.

Enter the **Rwanda Wildlife Conservation Association** (RWCA), which has been working for five years to address the declining population of grey crowned cranes. A project funded through CEPF's investment in the Eastern Afromontane Biodiversity Hotspot demonstrated how partnering with local communities can benefit people, government and biodiversity. The project enabled RWCA to hire and train women and men from local communities to improve patrolling of the protected area and gather data on the cranes. The number of patrols and area covered increased, as did the number of cranes, from just 71 in 2017 to 134 in 2019. Project participants also educated the community on the importance of protecting the marsh and worked with them to plant 5,500 indigenous trees to restore habitat. RWCA coordinated with fellow CEPF grantee **International Crane Foundation** (ICF), which set up conservation agreements with community members to provide livelihood benefits for residents who halted poaching and unsustainable use. CEPF's funding also helped build up skills and knowledge for both grantees' staff.

The CEPF grants to RWCA and to ICF, which together total just US\$80,900, are among more than 160 CEPF-funded projects designed to nurture grassroots conservation of the most biodiverse and highly threatened places in the Eastern Afromontane Biodiversity Hotspot. Step by step, these targeted interventions are building an empowered local conservation force that is well placed to forge a future for the Eastern Afromontane's nature and communities.

Grey-crowned crane (*Bradypterus graueri*). © O. Langrand

L'AGENCE FRANÇAISE DE DÉVELOPPEMENT

L'Agence Française de Développement (the French Development Agency) is a financial institution that is at the heart of France's Development Assistance Policy. It supports a wide range of economic, social and environmental projects in more than 74 countries. www.afd.fr

CONSERVATION INTERNATIONAL

Through cutting-edge science, innovative policy and global reach, Conservation International empowers people to protect the nature that we rely on for food, fresh water and livelihoods. With offices in 27 countries around the world, the organization works directly with the people who live closest to the forests, oceans and grasslands that benefit us all. www.conservation.org

THE EUROPEAN UNION (EU)

Comprising 27 member countries, the European Union is the largest single provider of development aid in the world. The EU development policy recognizes biodiversity as a crucial element for human well-being through the production of food, fish, fuel, fiber and medicines; the regulation of water, air and climate; and the maintenance of land fertility. Through EuropeAid, the EU invests in biodiversity and development projects in more than 100 countries. www.europa.eu

THE GLOBAL ENVIRONMENT FACILITY (GEF)

The Global Environment Facility is the world's largest public funder of projects to improve the global environment. The GEF unites 183 member governments together with leading international development institutions, civil society organizations and the private sector in support of a common global environmental agenda. www.thegef.org

JAPAN GOV
THE GOVERNMENT OF JAPAN

THE GOVERNMENT OF JAPAN

The Government of Japan is one of the largest providers of development assistance for the environment. Japan seeks constructive measures and concrete programs to preserve unique ecosystems that provide people with important benefits and help reduce poverty. www.env.go.jp/en

THE WORLD BANK

The World Bank is the world's largest source of development assistance. It works in more than 100 developing economies to fight poverty and to help people help themselves and their environment. www.worldbank.org

CEPF-funded projects contribute to many of the U.N. targets for biodiversity and sustainable development.

UN

CONVENTION ON BIOLOGICAL DIVERSITY AICHI TARGETS

TARGET \ 1 \

By 2020, at the latest, people are aware of the values of biodiversity and the steps they can take to conserve and use it sustainably.

TARGET \ 2 \

By 2020, at the latest, biodiversity values have been integrated into national and local development and poverty reduction strategies and planning processes and are being incorporated into national accounting, as appropriate, and reporting systems.

TARGET \ 7 \

By 2020 areas under agriculture, aquaculture and forestry are managed sustainably, ensuring conservation of biodiversity.

TARGET \ 9 \

By 2020, invasive alien species and pathways are identified and prioritized, priority species are controlled or eradicated, and measures are in place to manage pathways to prevent their introduction and establishment

TARGET \ 11 \

By 2020, at least 17 percent of terrestrial and inland water, and 10 percent of coastal and marine areas, especially areas of particular importance for biodiversity and ecosystem services, are conserved through effectively and equitably managed, ecologically representative and well-connected systems of protected areas and other effective area-based conservation measures and integrated into the wider landscapes and seascapes.

TARGET \ 12 \

By 2020, the extinction of known threatened species has been prevented and their conservation status, particularly of those most in decline, has been improved and sustained.

TARGET \ 20 \

By 2020, at the latest, the mobilization of financial resources for effectively implementing the Strategic Plan for Biodiversity 2011–2020 from all sources, and in accordance with the consolidated and agreed process in the Strategy for Resource Mobilization, should increase substantially from the current levels. This target will be subject to changes contingent to resource needs assessments to be developed and reported by Parties.

UN

SUSTAINABLE DEVELOPMENT GOALS

GOAL 2 \ ZERO HUNGER \

End hunger, achieve food security and improved nutrition and promote sustainable agriculture.

GOAL 4 \ QUALITY EDUCATION \

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

GOAL 5 \ GENDER EQUALITY \

Achieve gender equality and empower all women and girls.

GOAL 6 \ CLEAN WATER AND SANITATION \

Ensure availability and sustainable management of water and sanitation for all.

GOAL 8 \ DECENT WORK AND ECONOMIC GROWTH \

Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

GOAL 12 \ RESPONSIBLE CONSUMPTION AND PRODUCTION \

Ensure sustainable consumption and production patterns.

GOAL 13 \ CLIMATE ACTION \

Take urgent action to combat climate change and its impacts.

GOAL 14 \ LIFE BELOW WATER \

Conserve and sustainably use the oceans, seas and marine resources for sustainable development.

GOAL 15 \ LIFE BELOW WATER \

Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss.

GOAL 16 \ PEACE, JUSTICE AND STRONG INSTITUTIONS \

Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels.

Langrand

SEPTEMBER 2018

New funding from L'Agence Française de Développement

Long-time CEPF donor partner L'Agence Française de Développement (AFD, also known as the French Development Agency) finalized an agreement to provide an additional 6 million euros to CEPF for biodiversity conservation.

A CEPF donor since 2006, AFD's additional 2018 funding went to civil society organizations working on conservation in two specific biodiversity hotspots—Madagascar and the Indian Ocean Islands, and the Guinean Forests of West Africa. The contribution marked the start of a new era in the partnership with AFD, which yielded an even further commitment of 14 million euros starting in 2019.

"Our biodiversity commitment is mainly at two levels: continue to improve the management of all environmental impacts of our portfolio and increase our funding and impact in support of biodiversity, which we recognize as an indispensable pillar of development and the fight against climate change. To fulfill our commitment, we need powerful allies. CEPF is one of those allies with whom we wish to continue and increase our collaboration," said Rémy Rioux, AFD's chief executive officer.

OCTOBER 2018

CEPF grantee receives Midori Prize

CEPF grantees are often unsung heroes in conservation, which is why it's especially exciting when one is recognized on an international scale for their accomplishments. In October, Assad Serhal, the director general for the Society for the Protection of Nature in Lebanon (SPNL), received a Midori Prize for Biodiversity.

The other two winners of the 2018 prize were Abdul Hamid Zakri, founding chair of the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES), and Kathy MacKinnon, chair of the IUCN World Commission on Protected Areas and former lead biodiversity specialist for the World Bank. She collaborated closely with CEPF as the former task team leader and Working Group member for the World Bank, one of CEPF's six global donors.

Established in 2010 by the Japan-based AEON Environmental Foundation, the prize honors outstanding contributions to the conservation and sustainable use of biodiversity.

Midori Prize for Biodiversity winner Assad Serhal, center, stands with his team from the Society for the Protection of Nature in Lebanon. © O. Langrand

NOVEMBER 2018

Birds in Mauritius are making a comeback

On an island known as home to a bird that became a symbol of extinction—the dodo—other native birds are in the midst of a resurgence with the help of focused, long-term support from conservation organizations and the government. In November, the IUCN Red List of Threatened Species "downlisted" the pink pigeon (*Nesoenas mayeri*) from Endangered to Vulnerable, reflecting its reversal of fortune from a total population of just nine birds in 1990 to a count of 400 in 2018. This conservation success was followed by the downlisting of another species unique to Mauritius, the echo parakeet (*Psittacula eques*) from Endangered to Vulnerable in December 2019. CEPF grantees Ebony Forest Ltd. and Mauritian Wildlife Foundation are among the conservationists who have worked for many years—well before CEPF began its investment in the Madagascar and the Indian Ocean Islands Biodiversity Hotspot—to keep these species going through approaches such as captive breeding, habitat restoration and community engagement. And these efforts contribute to implementation of the Mauritius government's National Biodiversity Strategy and Action Plan.

Pink pigeon (*Nesoenas mayeri*), Mauritius. © O. Langrand

DECEMBER 2018

CEPF launches new gender toolkit

To further CEPF's commitment to addressing gender issues, and to help conservationists mainstream gender into their projects, CEPF staff talked to subject experts from around the world and pulled together available resources. The result: a new gender toolkit available in English, French, Portuguese and Spanish.

Among the contents:

- Sample questions to help guide what to consider when incorporating gender into projects.
- Definitions of gender-related terms like "gender bias," "gender equity" and "sex-disaggregated."
- Suggestions for how to overcome barriers grantees might encounter while trying to mainstream gender considerations into their work.

The toolkit has become one of CEPF's most popular publications for grantees.

Grantees in the East Melanesian Islands assess progress

Fifty-six CEPF grantees and partners met in Honiara, Solomon Islands, for the mid-term review of CEPF's East Melanesian Islands Biodiversity Hotspot investment, assessing progress since the 2013 start of CEPF's eight-year, US\$9 million program in the hotspot. Participants came from six countries—Papua New Guinea, Solomon Islands, Vanuatu, Australia, Fiji and the United States—to share their experiences and results, and identify key gaps and opportunities.

At the midway point of the investment, 45 grantee organizations—including 30 that originate from the hotspot—reported that they strengthened their technical and administrative capacities. Grantees also filled critical gaps by generating baseline information on 23 globally threatened species and 20 Key Biodiversity Areas used to develop and implement conservation strategies for CEPF, governments and other public and private donors.

To date, more than 180 communities have benefited from the improved management of their environment and the associated ecosystem services, including from improved food security through sustainable harvesting and agriculture, as well as ecotourism development. While participants noted important advances, they also expressed concern over continued threats from logging, oil palm and mining expansion that put biodiversity and communities at risk.

Participants in the mid-term assessment of CEPF's investment in the East Melanesian Islands Biodiversity Hotspot. © CI/photo by Michele Zador.

JANUARY 2018

Guinean Forests organizations strengthened

As part of CEPF efforts to strengthen grassroots conservation organizations, the regional implementation team for the Guinean Forests of West Africa Biodiversity Hotspot organized a training workshop for groups that received small grants from CEPF to enhance their project implementation and reporting. The workshop took place on São Tomé Island with 19 representatives from nine countries. It consisted of three days of presentations and group exercises, and one full day of field visits. The workshop also served as a learning exchange and networking opportunity.

CONTINUED

YEAR IN REVIEW

FEBRUARY 2019

New frog species discovered, given excellent names

The Western Ghats and Sri Lanka Biodiversity Hotspot was the site of exciting new species finds.

- In a roadside puddle in Kerala, India, University of Delhi amphibian researcher Sonali Garg and her research supervisor, SD Biju, discovered a new genus and species of frog: the mysterious narrow-mouthed frog (*Mysticellus franki* sp. nov.).

"This frog went unnoticed until now probably because it appears for less than four days for breeding activities and lives a secretive lifestyle for the rest of the year," Garg said.

The findings were published in the journal *Scientific Reports*, 13 February 2019 issue.

- A separate team of researchers published, in the March edition of the journal *PeerJ*, the discovery of another new species: the starry dwarf frog (*Astrobatrachus kurichiyana*), so named for the many bluish-white spots that stand out on the thumbnail-sized frog's brown and orange body.

Both studies were in part funded by CEPF, which invested in the hotspot from 2008 through 2015.

Mysterious narrow-mouthed frog (*Mysticellus franki* sp. nov.). © SD Biju

MARCH 2019

Tropical Andes grantees exchange results, lessons

More than 80 grantees and partners—representing 40 civil society organizations hailing from Bolivia, Colombia, Ecuador and Peru—met in Quito, Ecuador, for the mid-term assessment of CEPF's US\$10 million investment in the Tropical Andes Biodiversity Hotspot.

Participants shared their experiences about the implementation of conservation initiatives and evaluated CEPF's progress toward achieving conservation priorities. Grantees are improving management in 27 Key Biodiversity Areas covering 2.5 million hectares by providing incentives to local communities for conservation through promotion of nature tourism, protection of watersheds vital to municipal water supply, mining best practices, and support of biodiversity-friendly coffee and other agricultural products. CEPF has helped bring together former combatants in Colombia toward achieving common conservation goals. Participants also noted CEPF support is building capacity for 38 nongovernmental organizations.

Despite the progress, threats in the region continue to loom large, especially from mining and agricultural encroachment. A discussion on violence against Andean environmental defenders brought home the serious challenges that CEPF grantees and their local partners confront in their daily work.

Participants in the mid-term assessment for the CEPF investment in the Tropical Andes Biodiversity Hotspot. © C. Moreno/Profonanpe.

APRIL 2019

Grantees gather in Brazil to gauge conservation of the Cerrado

A mid-term assessment for the US\$8 million, five-year CEPF investment in the Cerrado Biodiversity Hotspot brought 56 representatives of grantee and partner organizations to Brasilia to review conservation progress in the region and exchange ideas. The Cerrado—the world's most biodiverse savanna—is one of the world's leading areas for agricultural and livestock production, but its valuable ecosystems are under extreme threat from habitat degradation. CEPF grantees in the hotspot are working to find a sustainable future for the region. Participants shared experiences relating to habitat restoration, agro-extractives, land management and strengthening of civil society. Another objective was to create hubs for grantees implementing projects in the same region, and new collaborations have resulted.

Group discussions at the CEPF mid-term assessment for the Cerrado Biodiversity Hotspot investment. © A.Amaral

MAY 2019

Report: Up to 1 million species threatened with extinction

One million species at risk of extinction: That was one of several dire conclusions found in the summary of global biodiversity assessment issued by the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES). The U.N.-backed report presents overwhelming evidence of the precarious state of the world's ecosystems and species, and the threat to humanity posed by widespread biodiversity loss.

"We are eroding the very foundations of our economies, livelihoods, food security, health and quality of life worldwide," said IPBES Chair Sir Robert Watson. "The report also tells us that it is not too late to make a difference, but only if we start now at every level from local to global."

CEPF published a response to the report, "Lifeline for Biodiversity," outlining the work our grantees are doing to protect the world's biodiversity and ecosystems. www.cepf.net/lifeline-for-biodiversity

MAY/JUNE 2019

Important Mediterranean Basin ecosystems gain protections

CEPF grantees contributed to two major milestones in protecting vital ecosystems of the Mediterranean Basin Biodiversity Hotspot.

- Algeria's Djebel Babor Forest, at the edge of the Atlas Mountains, is home to the Endangered Barbary macaque (*Macaca sylvanus*), Endangered Algerian nuthatch (*Sitta ledanti*) and the Critically Endangered Algerian fir (*Abies numidica*). The forest was classified as a national park in 1921, but in 1985 its protections were dropped. In 2013, organizations led by the Algerian conservation group Association de Réflexion, d'Échanges et d'Actions pour L'Environnement et le Développement (AREA-ED), with support from CEPF, came together to protect the forest from fires, illegal logging and overgrazing. AREA-ED held meetings with local communities and rolled out a public education campaign. Those efforts contributed to the May decision by the Algerian government to declare the site a protected area again.

Grantees assess conservation progress in Indo-Burma

More than 130 conservation and development practitioners attended the final assessment workshop for CEPF's second investment in the Indo-Burma Biodiversity Hotspot. The US\$15.8 million investment began in 2013.

Investment results include:

- Strengthened conservation of 1.3 million hectares of Key Biodiversity Areas (KBAs) through community-based models.
- Demonstration of effective models for species conservation, leading to the stabilization or recovery of core populations of 32 globally threatened species.
- Strengthened capacity of more than 130 local organizations to design, implement and monitor the impacts of conservation projects.
- Tangible well-being benefits for more than 100 local and indigenous communities through livelihood interventions.
- 13 national policies, laws or regulations influenced in favor of biodiversity conservation.

The current investment will be completed in 2020. The ecosystem profile that set out CEPF's strategy for the hotspot was used by other funders to guide an additional US\$30 million in investment. On top of this, CEPF's grantees raised around US\$20 million in funding from other sources.

Participants in the final assessment workshop for the CEPF investment in the Indo-Burma Biodiversity Hotspot. © Ann Moey/IUCN

- For the past 15 years, the Center for Protection and Research of Birds of Montenegro (CZIP) fought tirelessly to block a controversial building development poised to destroy one of Europe's most important migratory bird sites, Ulcinj Sala. After a highly successful #SaveSalina campaign and online petition promoted with partners BirdLife and EuroNatur, the battle was won. The local parliament of the Ulcinj municipality voted to declare Ulcinj Sala a national protected area. CEPF supported CZIP from 2013 to 2017 to restore the infrastructure of the site, monitor birds and showcase the importance of the site to wider audiences.

Earth's most
biologically rich—
yet threatened—
terrestrial regions.

- Current CEPF investment
- Post CEPF investment
- Eligible for CEPF investment
- Other hotspots
- Planned future investment

To qualify as a biodiversity hotspot, an area must meet two strict criteria:

- Contain at least 1,500 species of vascular plants found nowhere else on Earth (known as “endemic” species).
- Have lost at least 70 percent of its primary native vegetation.

CEPF awards grants to civil society working on conservation in developing countries within the biodiversity hotspots.

There are 36 hotspots around the globe. Some are contained in a single country, such as Japan. Others include parts of several countries, such as the Mediterranean Basin Hotspot, which encompasses portions of 34 countries and territories.

DURING THE 2019 FISCAL YEAR OF 1 JULY 2018 TO 30 JUNE 2019, CEPF AWARDED

US\$9.7 million in new grants, bringing the amount it has invested in conserving critical ecosystems since 2000 to more than US\$242 million. By the end of the year, 2,408 grantees had received support from the fund since its inception. CEPF continued active granting in the Cerrado, East Melanesian Islands, Eastern Afromontane, Guinean Forests of West Africa, Indo-Burma, Madagascar and the Indian Ocean Islands, Mediterranean Basin, Tropical Andes, and Wallacea biodiversity hotspots. Revenue included a contribution of US \$6.9 million from L'Agence Française de Développement for projects in the Guinean Forests of West Africa and the Madagascar and the Indian Ocean Islands hotspots.

REVENUE	FY19	CUMULATIVE
Grants and contributions	7,158,768	318,232,531
Gain (loss) in foreign exchange	(239,424)	(1,731,803)
Interest earned	38,001	3,397,603
