	management for biodiversity conservation or sustainable use within		
\$ 8,000,000	four corridors targeted by CEPF grants.		
	At least five globally threatened species targeted by CEPF grants		
	have stable or improved conservation status.		
	At least 60 local and indigenous communities are empowered and		
	directly benefit for sustainable use of resources and/or restoration of ecological connectivity at the landscape scale.		

Intermediate Outcomes	Intermediate Indicators	Means of Verification	Important Assumptions
	At least six sustainable technologies and production best practices in the agriculture sector identified and disseminated to ensure protection of biodiversity, maintenance of ecosystem services and food security. At least four financial incentives for sustainable land-sparing agricultural and livestock practices promoted among commodity chains in priority corridors. At least two consistent public policies (legislation, policies, programs, public-private partnerships, etc.) created or adjusted to promote conservation and sustainable use of biodiversity.	Best practices dissemination tools. Grantee and RIT performance reports. Secretariat supervision mission reports. Adopted public policies.	Governments, private companies and donors will remain committed to sustainable development goals thus providing suitable and sufficient funding sources to expand best practices models. Private companies in key agriculture sectors will appreciate the business model for better environmental and social practices. Financial incentives will trigger increased interest for best
Outcome 2: Protected areas in the priority corridors expanded and the effectiveness of their management strengthened. US\$ 1,200,000	At least ten studies and analyses carried out to justify the creation or expansion of public protected areas in priority corridors and/or to promote conservation and sustainable use of biodiversity while valuing local and traditional culture within management plans of protected areas. Five protected areas located in the CEPF Priority KBAs with an integrated management plan designed and implemented. At least 10% of indigenous, <i>quilombola</i> and traditional community lands, located in the priority corridors, integrated in the planning and strategies for conservation and sustainable development at macro scale, respecting traditional knowledge and culture, as an alternative form of protection and management of lands outside of the official national system (SNUC). At least 50 new Private Natural Heritage Reserves (RPPN) established in priority KBAs.	Studies and maps provided to national, state and municipal governments. Protected Areas Tracking Tool (SP1 METT). Integrated management plans of protected areas. Strategic plans integrating community lands at macro scale; reports on alternative forms of conservation and management. Signed RPPN commitment agreements. Grantee and RIT performance reports. Secretariat supervision mission reports.	practices. Government policies will provide for legal enforcement of the Forest Law. The government is receptive to participation of private landowners and indigenous, quilombola and traditional communities in the effort of conservation and management of the Cerrado. Local organizations, private landowners, and indigenous, quilombola and traditional communities will be willing to play an active role in improving the protected area network and management.

	At least ten markets and supply chains for sustainably harvested nontimber forest products developed or enabled with direct benefit for networks or groups of women and youth in particular. Innovations regarding seeds, seedlings and planting that result in greater efficiency and lower cost in ecological restoration activities demonstrated in at least ten sites, especially in Permanent Preservation Areas (APPs) and Legal Reserves (LRs). Production capacity and management skills of 20 community-based businesses working with ecological restoration productive chain enhanced. One pilot network made of civil society organizations, academic institutions, businesses and governments supported to create synergies and provide socio-environmental benefits as incentives for ecosystem restoration and compliance with the Forest Law. At least two public policies (legislation, regional strategic plans, etc.) created or adjusted to promote ecosystem restoration and sustainable use of biodiversity. Priority actions identified in National Action Plans, especially on habitat management and protection, implemented for at least five priority threatened species.	timber forest products developed or enabled with direct benefit for networks or groups of women and youth in particular. 			by arguments about the biological,
			ecological, social and cultural
			values of natural ecosystems.

Outcome 6: Strengthened capacity of civil society organizations to influence better management of territories and of natural resources and support other investment priorities in the hotspot.

US\$ 2,000,000

At least five networks and/or alliances of civil society organizations strengthened, with enhanced skills to participate in relevant forums.

At least 100 members of governance bodies and councils (national councils, watershed committees, protected areas management boards, Citizenship Territories, state/municipal councils, etc.) with strengthened capacity to participate in and influence forums related to the conservation and sustainable use of the Cerrado.

At least 40 civil society organizations with developed and strengthened institutional and technical skills (environment, conservation strategy and planning, management, policy advocacy, fundraising and reporting, regulatory frameworks, etc.) to function effectively and participate in relevant conservation and management actions guided by the ecosystem profile.

At least two multi-stakeholder initiatives (MSI) that involve the private sector (global commodity chains), small farmers, traditional communities, governments and donors promoted to identify synergies and to catalyze integrated actions and policies for the conservation and sustainable development of the Cerrado.

At least 20 publications (books, manuals, technical reports, websites, etc.) or awareness raising actions (broadcasting spots, public campaigns and media outreach) on the Cerrado biodiversity, ecosystem services, protected areas, restoration, sustainable practices and climate resilience and civil society participation published.

At least one tri-national initiatives to raise awareness for protection and management of Cerrado KBAs in Brazil, Bolivia and Paraguay launched

Training needs assessments and evaluation reports.

Grantee and RIT performance reports.

Civil Society Tracking Tool (CSTT) on CEPF's investment beneficiaries.

Secretariat supervision mission reports.

Published books, manuals, websites, etc. on the functions of the Cerrado.

Publicized awareness raising campaigns on the Cerrado

The operating environment for civil society will remain constant or improve across the hotspot.

Local organizations will be willing to play an active role in site-based conservation, in mainstreaming biodiversity and in governance forums.

The key capacity limitations of civil society organizations can be addressed through a combination of capacity building and grant support.

Civil society organizations are able to retain trained staff who benefit from capacity building opportunities.

Civil society organizations, governments and private companies are willing to work collaboratively to respond to conservation challenges.

Increased widespread awareness on the values of the Cerrado will translate into increased support for conservation initiatives locally.

Outcome 7:	At least 60 civil society organizations, including at least 40 local and	Civil Society Tracking Tool	Qualified organizations will apply to
