

ENVIRONMENTAL EDUCATION FOR BIODIVERSITY CONSERVATION CORRIDOR IN THE REGION FUTU – MATUTUÍNE – MOZAMBIQUE

The main objective of the activity was to capacitate the community and the children at school about environmental education. The contents of the workshops were: ecologic cycle, causes of environmental damages, environmental monitoring in each community and alternatives for solution. We did the rehabilitation of CCBiodiversity and prepare didactic materials.

Results:

Communities	School			Community			Remarks
	total	girls	boys	total	women	men	
Madjadjane	61	21	40	10	7	3	The school children are now using recycle material for making designs, decoration and other domestic uses.
Machia	45	30	15	32	27	5	The community see the need of conserving the environment in order to preserve for the future generations.
Chia	34	12	22	7	7	0	Absence of men was because most of them are working in RSA and Maputo.
Mussongue	26	8	18	26	14	12	Participants are asking for more capacitation in other to learn about diferent issues related to environment.
Total	166	71	95	75	55	20	

Negative impact on the environment: the degradation of the forest and the soil caused by uncontrolled fires. Cuting of trees for house construction and handcraft.

Solutions: The communities are preparing local rules and regulations in order to control the use and management of natural resources.
