

## Contributions to the U.N. Convention on Biological Diversity

Figures as of 30 June 2018

Aichi Biodiversity Target	Contribution to Impact	Operational Contribution
 <p>Target 1. By 2020, at the latest, people are aware of the values of biodiversity and the steps they can take to conserve and use it sustainably.</p>	<p>At least 149,066 people have benefited from training in biodiversity, conservation and related topics.</p>	<p>CEPF has supported a total of 541 projects with a primary emphases Education and Awareness, and Capacity Building, valued at US\$39,637,948.</p>
 <p>Target 2. By 2020, at the latest, biodiversity values have been integrated into national and local development and poverty reduction strategies and planning processes and are being incorporated into national accounting, as appropriate, and reporting systems.</p>	<p>CEPF has influenced 249 policies, laws or regulations in 24 biodiversity hotspots.</p>	<p>CEPF has supported a total of 143 projects in 24 hotspots with a primary focus on Mainstreaming Biodiversity, valued at US\$14,357,163.</p>
 <p>Target 7. By 2020 areas under agriculture, aquaculture and forestry are managed sustainably, ensuring conservation of biodiversity.</p>	<p>CEPF has contributed to improved biodiversity management of 8,085,743 hectares of production landscapes in 18 hotspots.</p>	<p>CEPF has supported 256 projects with a primary emphasis on Strengthening Management Outside Protected Areas, totaling US\$24,459,495.</p>
 <p>Target 9. By 2020, invasive alien species and pathways are identified and prioritized, priority species are controlled or eradicated, and measures are in place to manage pathways to prevent their introduction and establishment.</p>	<p>Biosecurity plans prepared. Eradications undertaken. IAS training delivered.</p>	<p>CEPF has supported 87 projects with a component dedicated to addressing Invasive Alien Species, totaling US\$6,450,653, in 11 biodiversity hotspots.</p>
 <p>Target 11. By 2020, at least 17 percent of terrestrial and inland water, and 10 percent of coastal and marine areas, especially areas of particular importance for biodiversity and ecosystem services, are conserved through effectively and equitably managed, ecologically representative and well-connected systems of protected areas and other effective area-based conservation measures and integrated into the wider landscapes and seascapes.</p>	<p>CEPF has supported the creation or expansion of 14,835,510 hectares of new protected areas in 21 biodiversity hotspots. CEPF has strengthened the management and protection of 46,527,673 hectares of Key Biodiversity Areas in 22 hotspots. CEPF has contributed to improved biodiversity management of 8,085,743 hectares of production landscapes in 18 hotspots.</p>	<p>CEPF has supported 556 projects with primary emphases on Protected Areas Creation, and improved management, totaling US\$62,420,611.</p>
 <p>Target 12. By 2020 the extinction of known threatened species has been prevented and their conservation status, particularly of those most in decline, has been improved and sustained.</p>	<p>At least 1,250 species have benefited from CEPF support.</p>	<p>CEPF has supported 428 projects with a focus on Species Conservation, totaling US\$34,599,215.</p>
 <p>Target 20. By 2020, at the latest, the mobilization of financial resources for effectively implementing the Strategic Plan for Biodiversity 2011--2020 from all sources, and in accordance with the consolidated and agreed process in the Strategy for Resource Mobilization, should increase substantially from the current levels. This target will be subject to changes contingent to resource needs assessments to be developed and reported by Parties.</p>	<p>CEPF has supported 27 sustainable finance mechanisms that remain active, including five functioning PES schemes.</p>	<p>CEPF has supported 62 projects with a primary emphasis on Conservation Finance, totaling US\$7,455,716.</p>
