

## Table 2: Eastern Arc Mountains and Coastal Forests of Tanzania and Kenya Logical Framework for Consolidation

Objective	Targets	Means of Verification
Build upon the achievements in Tanzania and Kenya during the first CEPF investment.		
Outcome 1: Ensure financial sustainability of livelihood initiatives for people residing next to priority forests.	Support for 10 initiatives that improve the livelihoods of people neighboring priority forests including: Taita Hills and Kwale in Kenya; East Usambara, Bunduki Gap, and	Grantee reports Butterfly pupae sale receipts and records
	Magombera in Tanzania.	Honey/beeswax production and sale records
	Increase sales of butterfly pupae and other products from Amani Nature Reserve, Taita and Arabuko Sokoke through the Mombasa Butterfly Exhibit.	Neem and Naturub production and sale records
	Improved production and sales of honey and bee products.	
	Improved production and marketing of essential oils (neem, <i>Ocimum</i> ) and products (e.g. Naturub).	
	All 10 initiatives are financially sustainable by June 2015, generating sufficient profits to ensure a solid foundation for future operations through 2020.	
Outcome 2: Consolidate the gains in increasing forest connectivity in critical parts of the EACF.	10 communities engaged in actively rehabilitating and restoring forest stands in Taita Hills and Dakatcha woodlands in Kenya	Establishment or expansion of site support groups in the critical areas

	and Derema corridor, Bunduki Gap, Mngeta Corridor, and Magombera Forest in Tanzania.	Project reports; reports on number of seedlings planted and survived the first year. METT 2
Outcome 3: Consolidate communication networks, raise awareness and solidify the education achievements for the long-term benefit of civil society.	Support major update and overhauls of the Coastal Forests and Eastern Arc websites.	Number of resource manuals distributed
	TFCG <i>Arc Journal</i> to capture emerging conservation results from the region.	Number of visitors to the websites per year
	Best CEPF technical reports (biodiversity surveys, sustainable funding etc) for local decision makers.	Thematic Arc Journals produced and available electronically and in hard copy
	2 special issues of the <i>Journal of East African</i> <i>Natural History</i> to fully capture the scientific results of CEPF and other work in the region	Distribution list
	accompanied by 2 issues of Komba in Swahili for children.	Distribution list
	Promote the Teachers' resource manual for primary schools.	Issues available on BioOne and revenue to the Journal; increased readership and down loading of articles
	Impact Assessment re Knowledge, Attitudes and Practice to determine the effectiveness of the awareness raising work.	Assessment report and conclusions delivered to stakeholders
	International and local visitors to the USAID Mombasa butterfly exhibit made aware of the region and conservation activities.	Documentation of NMK awareness raising activities and visitor records
	5 Villages around Derema made aware of Joint	Documentation of awareness raising

	Forest Management responsibilities and benefits.	activities in Derema
	benefits.	
	Outreach for IBA Site Support Groups.	Documentation of awareness raising activities at IBA sites
	Recognition of the Eastern Arc as a World Heritage Site.	Final dossier presented to UNESCO
Outcome 4: Availing biological and forest	CEPF, CI and national	National and international databases
change data to leverage REDD+ and	biodiversity/conservation outcome databases	available to the conservation in development
REDD Readiness for the EACF.	updated with effective links to World	sectors
	Biodiversity Databases.	
	Forest carbon and degradation baselines	
	supporting REDD+ for region forests.	Data submitted to REDD implementing agencies in Kenya and Tanzania.
	Biodiversity and livelihood baselines to	<i>c ,</i>
	support monitoring of REDD+ co-benefits.	Data submitted to REDD implementing agencies in Kenya and Tanzania.
	Region status reports for all interested parties.	
		Status reports available
	Biodiversity data available in downloadable	
	form to support conservation initiatives in the	
	region.	Frequency of downloads from website
